- An insured person who no longer lives in The Netherlands will no longer be covered by the insurance policy after his or her departure.
- Nor will the insurance policy cover any trips or stays abroad made by an insured person in the context of his or her studies or work placement.

1.4 *Where are you insured?*

You are insured abroad all over the world.

In The Netherlands you are only insured:

- during paid travel that was booked in advance and involves at least one overnight stay. You will need proof of the booking, reservation or payment;
- while you are en route to your holiday destination abroad or while you are on your way home from your holiday destination abroad.

1.5 *When are you insured?*

1.6.1 Nuclear reactions and war risk

We do not cover damages caused by or ensuing from:

- war risk.

Explanation of nuclear reactions

No cover

We do not cover damages caused by, occurring during or ensuing from nuclear reactions, regardless of how these arose.

Cover

However, we do cover damages caused by radioactive nuclides. In this case these nuclides must be situated outside of a nuclear installation¹, and they must be used or intended for industrial, commercial, agricultural, medical, scientific, education or (non-military) security purposes. The organisation in question must have a government authorisation for this, insofar as one is required. This authorisation must relate to the development, use, storage and disposal of radioactive materials. This cover does not apply to instances in which an act or treaty provides that a third party is liable for the damages incurred.

¹ A nuclear installation is defined as a nuclear installation in the sense of the Dutch Nuclear Accidents Liability Act (Statute Book 1979-225). The same applies to nuclear installations on board a ship
